Exemplification of the law of *reflection*
the angle of incidence is equal to the
of reflection": in other words, there is
the exact reverse of the object appearing
reflection. Analyze this as here depicted

from the object to
object as in last case.
VIII. Example of *artificial*
the ground lines radiate from a central
exactly below the source of light on the gr
itself—not the horizon—just
the foot of the lamp-pos
radiating lines on the gr
